Dear Secretary Williams:

Enclosed for filing in the referenced docket are the original and ten copies of The Burlington Northern and Santa Fe Railway Company's Notice of Exemption, and a check for \$3,000.00, covering the filing fee.

Please acknowledge receipt of this material by date stamping the enclosed copy of this letter and returning it to me in the enclosed self-addressed stamped envelope.

The environmental and historic reports have been forwarded to the responsible agencies and copies have been directed to the Section of Environmental Analysis. The Notice of Exemption includes a certificate of notice upon various interested state and federal authorities (the U. S. Department of the Interior – National Park Service, Recreation and Conservation Assistance Program; the U. S. Department of the Interior – National Park Service, Land Resource Division; the Department of Defense, Military Traffic Management Command; the Montana Public Service Commission; the Montana Department of Transportation; and the Chief of Forest Service, U. S. Department of Agriculture).

Please note that we have not received the affidavit of publication from the Lewistown News-Argus as of the date of filing. We will send the STB ten copies plus the original upon receipt.

Sincerely,

Brian Nettles

### **BEFORE THE**

### SURFACE TRANSPORTATION BOARD

Abandonment of a line of Railroad Between BNSF 9.50 near Moore, Montana, and M.P. 28.35 near Lewistown, Montana, and between M.P. 0.00 and M.P. 1.30 and between M.P. 0.00 and M.P. 1.10 near Lewistown, in Fergus County, Montana NOTICE OF EXEMPTION Docket No. AB-6 (Sub-No. 434X)

### TO THE SURFACE TRANSPORTATION BOARD:

BNSF Railway Company (BNSF) hereby notifies the Board that it intends to abandon its line of railroad between M.P. 9.50 near Moore, Montana to M.P. 28.35 near Lewiston, Montana and the 1.30 mile Berg Lumber Spur (Milepost 0.00 - Milepost 1.30) and the Heath Spur (Milepost 0.00 - Milepost 1.10), a total distance of 21.25 miles, pursuant to the Board's Exemption of Out of Service Rail Lines, 49 C.F.R. § 1152.50 and in support of the Notice, respectfully provides the following information:

- I. Proposed consummation date for the abandonment.
  - January 16, 2006
- II. Certification required in 49 C.F.R. § 1152.50(b)

The attached Certification of Michael Smith certifies that no formal complaint filed by a user of rail service on this line (or a state or local government entity acting on behalf of such user) regarding cessation of service over the line is pending with the Board or any U.S. District Court or has been decided in favor of a complainant within the last two years. The attached Verification of Richard A. Batie certifies that no local

traffic has moved over this line for at least two (2) years and any overhead traffic on the line can be rerouted over other lines.

- III. Information required by C.F.R. § 1152.22(a)(1-4), (7), (8) and (e)(4).(a) General
  - (1) Exact name of Applicant.

**BNSF** Railway Company

(2) Whether applicant is a common carrier by railroad subject to 49 U.S.C. Subtitle IV, Chapter 105.

Applicant is a common carrier by railroad subject to 49 U.S.C. Subtitle IV, Chapter 105.

(3) Relief sought.

BNSF seeks an exemption from Surface Transportation

Board approval authorizing the abandonment and

discontinuance of service of the Moore, Montana to

Lewistown, Montana line specified above.

(4) Detailed map of the subject line.

See Exhibit A.

(5) Name, title and address of representative of applicant to whom correspondence should be sent.

Michael Smith Freeborn & Peters 311 S. Wacker Dr., Suite 3000 Chicago, IL 60606-6677

(6) List of all United State Postal Service ZIP Codes that the line traverses.

The Moore, Montana to Lewistown, Montana line traverses United States Postal Service Zip codes 59457 and 59464.

(7) Statement of whether the properties proposed to be abandoned are suitable for other public purposes, including roads or highways, other forms of mass transportation, conservation, energy production or transmission or recreation. If the applicant is aware of any restriction on the title to the property, including any reversionary interest, which would affect the transfer of title or the use of property for other than rail purposes, this shall be disclosed.

The right of way may be suitable for use for other public purposes such as a trail. On part of the properties involved, title considerations may affect the conveyance of the land for use other than railroad purposes. Based on information in our possession, the line does contain federally granted rights-of-way. Any documentation in the railroad's possession will be made available promptly to those requesting it.

### IV. Level of protection.

The interest of railroad employees will be protected by the conditions imposed in Oregon Short Line RR Co. - Abandonment - Goshen, 360 I.C.C. 91 (1979)

V. Certification that the notice requirements of §§ 1152.50(d)(1) and 1105.11 have been met is attached.

Respectfully submitted,

Michael Smith Freeborn & Peters

311 S. Wacker Dr. Suite 3000 Chicago, Illinois 60606-6677

Phone: (312) 360-6724 Fax: (312) 360-6598

Date: November 23, 2005

### **VERIFICATION**

STATE OF TEXAS	)
	)ss
COUNTY OF TARRANT	)

Richard A. Batie makes oath and says he is Manager, Network

Development in the Network Development department of BNSF Railway Company; that
he has been authorized by the Applicant to verify and file with the Surface Transportation
Board the foregoing Notice of Exemption in AB-6 (Sub-No. 434X); that he affirms that
the line has had no local traffic in the prior two (2) years and that there is no overhead
traffic to be rerouted; that he has carefully examined all of the statements in the Notice;
that he has knowledge of the facts and matters relied upon in the Notice; and that all
representations set forth therein are true and correct to the best of his knowledge,
information, and belief.

Richard A. Batie

Manager, Network Development

Subscribed and sworn to before me the 22 no day of November 2005.

### BNSF RAILWAY COMPANY NO. AB-6 (Sub No. 434X)

### **CERTIFICATION**

I hereby certify that (1) no formal complaint filed by a user of rail service on this line (or a state or local government entity acting on behalf of such user) regarding cessation of service over the line is pending with the Board or any U.S. District Court or has been decided in favor of a complainant within the last two (2) years; (2) service of notice upon the U.S. Department of the Interior, National Park Service, Recreation Park Service, Land Resource Division; the Department of Defense, Military Traffic Management Command; the Montana Public Service Commission; the Montana Department of Transportation; and the Chief Forest Service, U.S. Department of Agriculture was accomplished by mailing a copy thereof on October 27, 2005; (3) the environmental and historic reports were serviced upon the agencies identified in 49 C.F.R. § 1105.7(b) and the State Historic Preservation Offices on October 27, 2005; (4) service of notice upon the State Clearinghouses was accomplished by mailing a copy thereof on October 27, 2005; and (5) the publication requirements of 49 C.F.R. § 1105.12 have been complied with, to wit: publication of notice was accomplished on November 9, 2005 in the Lewistown News-Argus, affidavit of publication is attached.

Michael Smith Freeborn & Peters

### BEFORE THE

### SURFACE TRANSPORTATION BOARD

Abandonment of a line of Railroad Between BNSF 9.50 near Moore, Montana, and M.P. 28.35 near Lewistown, Montana, and between M.P. 0.00 and M.P. 1.30 and between M.P. 0.00 and M.P. 1.10 near Lewistown, in Fergus County, Montana

Docket No. AB-6 (Sub-No. 434X)

### **ENVIRONMENTAL REPORT**

The following information is submitted to the Surface Transportation Board by BNSF Railway Company (BNSF) in accordance with the Board's reporting requirements as set forth in 49 C.F.R. § 1105.7 for the purpose of assisting the Board's preparation of an environmental document regarding BNSF's Notice of Exemption for abandonment of its line between M.P. 9.50 near Moore, Montana to M.P. 28.35 near Lewiston, Montana and the 1.30 mile Berg Lumber Spur (Milepost 0.00 - Milepost 1.30) and the Heath Spur (Milepost 0.00 - Milepost 1.10), Fergus County, Montana, a total distance of 21.25 miles.

(1) <u>Proposed action and Alternatives</u>: Describe the proposed action, including commodities transported, the planned disposition (if any) of any rail line and other structures that may be involved, and any possible changes in current operations or maintenance practices. Also describe any reasonable alternatives to the proposed action. Include a readable, detailed map and drawings clearly delineating the project.

BNSF seeks to abandon and discontinue service of the line. A map of the line is attached as Exhibit A.

(2) <u>Transportation system</u>: Describe the effect of the proposed action on regional or local transportation systems and patterns. Estimate the amount of traffic (passenger or freight) that will be diverted to other transportation systems or modes as a result of the proposed action.

The proposed abandonment will have no affect on existing transportation systems or patterns as the line is out of service.

### (3) Land Use:

(i) Based on consultation with local and/or regional planning agencies and/or review of the official planning documents prepared by such agencies, state whether the proposed action is consistent with existing land use plans. Describe any inconsistencies.

BNSF believes that the proposed exemption will not be inconsistent with local or regional land use plans. The City of Lewistown and Fergus County are both interested in possibly pursing railbanking to preserve this particular corridor for future transportation and utility uses as well as some recreational trails. See Exhibit B, letter from the city of Lewistown, Montana.

(ii) Based on consultation with the U.S. Soil Conservation Service, state the effect of the proposed action on any prime agriculture land.

The proposed exemption should have no effect on prime farmland. The railroad does cross farmlands that would be prime farmland if they were irrigated. Because the abandonment entails only the proposed removal of the tracks and railroad ties, the impact on these lands is not a significant action that would prohibit the use of these lands for future agricultural production. See Exhibit C, letter from the Natural Resources Conservation Service.

(iii) If any action affects land or water uses within a designated coastal zone, include the coastal zone information required by § 1105.9

N/A

(iv) If the proposed action is abandonment, state whether or not the right-of-way is suitable for alternative public use under 49 U.S.C. § 10906 and explain why.

BNSF does not know whether the right-of-way is suitable for alternative public uses. The City of Lewistown and Fergus County are both interested in possibly pursing railbanking to preserve this particular corridor for future transportation and utility uses as well as some recreational trails. See Exhibit B, letter from the city of Lewistown, Montana.

### (4) Energy:

- (i) Describe the effect of the proposed action on transportation of energy.
- There are no longer any economically recoverable coal resources along the line.
- (ii) Describe the effect of the proposed action on recyclable commodities.

This abandonment and discontinuance will not adversely affect movement or recovery of recyclable commodities as the line is out of service.

(iii) State whether the proposed action will result in an increase or decrease in overall energy efficiency and explain why.

This abandonment will not result in an increase or decrease in overall energy efficiency as the line is out of service.

- (iv) If the proposed action will cause diversions from rail to motor carriage of more than:
  - (A) 1,000 rail carloads a year, or

(B) An average of 50 rail carloads per mile per year for any part of the affected line, quantify the resulting net change in the energy consumption and show the data and methodology used to arrive at the figure given.

There will be no diversions of traffic because the line is out of service.

### (5) Air:

- (i) If the proposed action will result in either:
- (A). An increase in rail traffic of at least 100% (measured in gross ton miles annually) or an increase of at least eight trains a day on any segment of the line effected by the proposed, or

No.

(B). An increase in rail yard activity of at least 100% (measured by carload activity), or

No.

(C). An average increase in truck traffic of more than 10% of the average daily traffic or 50 vehicles a day on any affected road segment, quantify the anticipated effect on air emissions.

The action will not involve an increase in truck traffic of more than 10% or 50 vehicles a day on any affected road segment as the line is out of service.

- (ii) If the proposed action affects a Class I or nonattainment area under the Clean Air Act, and will result in either:
  - (A) An increase in rail traffic of at least 50% (measured in gross ton miles annually) or an increase of at least three train a day on any segment of rail line, or
  - (B) An increase in rail yard activity of at least 20% (measured by carload activity), or
  - (C) An average increase in truck traffic or more than 10-% of the average daily traffic of 50 vehicles a day on a given road segment, then

state whether any expected increased emissions are within the parameters established by State implementation Plan. However, for a rail construction under 49 U.S.C. § 10901 (or 49 U.S.C. § 10505) or in a case involving the reinstitution of service over a previously abandoned line, only the three train a day threshold in this item shall apply.

The proposed abandonment will not result in an increase of rail or truck traffic because the line is out of service.

(iii) If the transportation of ozone depleting materials (such as nitrogen oxide and from) is contemplated, identify: the materials and quantity; the frequency of service; safety practices (including any speed restrictions); the applicant's safety record (to the extent available) on derailments, accidents and spills; contingency plans to deal with accidental spills; and the likelihood of an accidental release of ozone depleting materials in the event of a collision or derailment.

The proposed abandonment will not result in an increase of rail or truck traffic because the line is out of service.

- (6) Noise: If any of the thresholds identified in item (5)(c) of this section are surpassed, state whether the proposed action will cause:
  - (i) An incremental increase in noise levels of three decibels Ldn or more,

N/A

(ii) An increase to a noise level of 76 decibels Ldn or greater. If so, identify sensitive receptors (e.g. schools, libraries, hospitals, residences, retirement communities and nursing homes) in the project area and quantify the noise increase for those receptors if the thresholds are surpassed.

N/A

### (7) **Safety**:

(i) Describe any effects of the proposed action on public health and safety (including vehicle delay time at railroad crossings).

This abandonment should have no adverse effect on health or public safety. There are 39 public crossings and 15 private crossings.

During salvage operations on the line, if any may be required, precautions will be taken to ensure public safety, and contractors will be required to satisfy all applicable health and safety laws and regulations.

(ii) If hazardous materials are expected to be transported, identify: the materials and quantity; the frequency of service; whether chemicals are being transported that, if mixed, could react to form more hazardous compounds; safety practices (including any speed restrictions); the applicant's safety record (to the extent available) on derailments, accidents and hazardous spills; the contingency plans to deal with accidental spills, and the likelihood of and accidental release of hazardous materials.

Abandonment will not result in transportation of hazardous materials.

(iii) If there are any known hazardous waste site or sites where there have been known hazardous materials spills on the right-of-way, identify the location of those sites and the types of hazardous materials involved.

There is evidence of known hazardous waste sites where there have been known hazardous material spills on the right of way.

On February 9, 1995 there was a release of RP Mercaptan 5 (odor agent for propane) at the Pacific Hide and Fur Depot (leased property).

The former Montana Power Company was responsible for the release of the RP Mercaptan 5 odor agent and they handled the cleanup of the site.

On October 16, 1996 100 gallons of diesel fuel was spilled near the Lewistown depot. A BNSF contractor handled the cleanup of the site.

A tarry substance was discovered on the Berg Lumber Spur in

Lewistown. Approximately 500 feet of track has been removed and the

right of way excavated to a depth of approximately twelve inches. BNSF

is now awaiting sample results from a lab to ensure that all contamination has been removed. This material has been removed from the site. BNSF is working with the State of Montana Department of Environmental Quality to ensure that cleanup work at the site has been completed.

### (8) Biological resources:

(i) Based on consultation with the U.S. Fish and Wildlife Service, state whether the proposed action is likely to adversely affect endangered or threatened species or areas designated as a critical habitat, and if so, describe the effects.

BNSF believes that the proposed exemption will not affect endangered or threatened species or areas designated as critical habitat. The following listed species may be present in the action area: Pallid Sturgeon (*Scaphirhynchus albus*), the Bald Eagle (*Haliaeetus leucocephalus*) and the Black-footed Ferret (*Mustela nigripes*). See Exhibit D, letter from the US Fish and Wildlife Service.

(ii) State whether wildlife sanctuaries or refuges, National or State parks or forests will be affected, and describe any effects.

BNSF believes that the proposed exemption will not affect wildlife sanctuaries or refuges, National or State parks or forests. The Montana Department of Fish, Wildlife & Parks owns and operates many sites in the Lewistown vicinity due to its proximity to Big Spring Creek, which is considered to be one of the most valuable fisheries resources in the state. See Exhibit E, letter from the Montana Fish, Wildlife & Parks. BNSF will require its salvage contractors to take every measure and precautions to ensure that they will not impact the Montana Fish, Wildlife and Parks sites.

There are no wildlife sanctuaries or refuges, National or State parks or forests in the proposed project area. See Exhibit F, letter from the Bureau of Land Management.

The National Park Service reviewed this project and determined that no parks will be affected. See Exhibit G, response from the National Park Service.

### (9) Water:

(i) Based on consultation with State water quality officials, state whether the proposed action is consistent with applicable Federal, State or local water quality standards. Describe any inconsistencies.

BNSF believes that the proposed exemption will be consistent with applicable Federal, State or local water quality standards. In general, The Montana Water Quality Act prohibits the discharge of sewage, industrial or other wastes, including sediment, to state waters without a current permit from the Department. See Exhibit H, letter from the Montana Department of Environmental Quality. BNSF will require its salvage contractors to take every measure and precaution to ensure that no pollutant will be discharged into state waters.

(ii) Based on consultation with the U.S. Army Corps of Engineers, state whether permits under Section 404 of the Clean Water Act (33 U.S.C. § 1344) are required for the proposed action and whether any designated wetlands or 100-year floodplains will be affected. Describe the effects.

BNSF believes that the proposed exemption will not require a Section 404 permit. No Department of the Army permit is required for this project. See Exhibit I, letter from the Army corps of Engineers.

BNSF believes that the proposed exemption will not affect the 100-year floodplains. Some of the proposed abandonment crosses the Big Spring Creek. See Exhibit J, letter from the Fergus county Planning.

(iii) State whether permits under Section 402 of the Clean Water Act (33 U.S.C. § 1344) are required for the proposed action. (Applicants should contact the U.S. Environmental Protection Agency or the state environmental protection or equivalent agency if they are unsure whether such permits are required.

BNSF believes that Section 402 permits will not be required for the proposed action. Construction related activities that result in greater than one acre of disturbance and may generate storm water runoff from the construction site during the life of the project must obtain authorization prior to initiation of the construction activity. For purposes of this regulation, construction activities include clearing, grading, excavation and stockpiling or placement of earthen materials. Routine maintenance activities that disturb less than five acres and do not change the original configuration of the site are not subject to this regulation. See Exhibit H, letter from the Montana Department of Environmental Quality.

(10) <u>Proposed Mitigation</u>: Describe any actions that are proposed to mitigate adverse environmental impacts, indicating why the proposed mitigation is appropriate.

Any salvage operations that may result will be in accordance with BNSF's general practice of requiring its private contractors to comply with all federal, state and local laws and regulations pertaining to the environment, including, but not limited to noise, air quality, water quality, and items of archaeological significance. The project itself should mitigate the environmental effects of reinstating active rail operations.

Respectfully Submitted,

Michael Smith
Freeborn & Peters

311 S. Wacker Dr. Suite 3000 Chicago, Illinois 60606-6677

Date: November 23, 2005

### BEFORE THE

### SURFACE TRANSPORTATION BOARD

Abandonment of a line of Railroad Between BNSF 9.50 near Moore, Montana, and M.P. 28.35 near Lewistown, Montana, and between M.P. 0.00 and M.P. 1.30 and between M.P. 0.00 and M.P. 1.10 near Lewistown, in Fergus County, Montana

Docket No. AB-6 (Sub-No. 434X)

### **HISTORICAL REPORT**

The following is submitted to the Surface Transportation Board by BNSF Railway Company (BNSF) in accordance with the Board's reporting requirements set forth in 49 C.F.R. § 1105.8 for the purpose of assisting the Board's environmental and historical assessment regarding BNSF's Notice of Exemption to abandon its line of railroad between M.P. 9.50 near Moore, Montana to M.P. 28.35 near Lewiston, Montana and the 1.30 mile Berg Lumber Spur (Milepost 0.00 - Milepost 1.30) and the Heath Spur (Milepost 0.00 - Milepost 1.10), Fergus County, Montana, a total distance of 21.25 miles.

(1) A U.S.G.S. topographic map (or alternate map drawn to scale and sufficiently detailed to show buildings and other structures in the vicinity of the proposed action) showing the location of the proposed action, and the locations and approximate dimensions of the railroad structures that are 50 years old or older and are part of the proposed action;

One copy of a U.S.G.S. Topographical map has been provided to the Montana State Historical Society and one copy is being provided to the Surface Transportation Board's Section of the Environmental Analysis upon filing of this Report.

(2) A written description of the right-of-way (including approximate widths, to the extent known) and the topography and urban and/or rural characteristics of the surrounding area:

The right of way varies from 100 to 200 feet in width. Most of the right of way is rural in nature but part of the right of way goes through Lewistown, Montana, a city with a 2000 population of 5,813 residents. There are two railroad stations along the line, Glengarry and Lewistown. Glengarry is not an incorporated town. The line is located within Fergus County which had a 2000 population of 11,893. The adjoining real estate is agricultural and flat to hilly. Wheat is a primary crop grown in the area.

(3) Good quality photographs (actual photographic prints, not photocopies) of railroad structures on the property that are 50 years old or older and of the immediately surrounding area;

There are five bridges that are 50 years or older in the immediate area of the abandonment. See Exhibit J.

(4) The date(s) of construction of the structures, and the date(s) and extent of any major alterations, to the extent such information is known;

The dates of construction of the bridges are included with the photographs. See Exhibit J.

(5) A brief narrative history of carrier operations in the area, and an explanation of what, if any, changes are contemplated as a result of the proposed action:

The right of way was acquired by two railroads between 1903 and 1917. The Great Northern Railway (GN) acquired part of the right of way. The balance of the right of way was acquired by The Montana Railroad Company, a predecessor of the Chicago Milwaukee St Paul and Pacific Railway (CMSTP&P). CMSTP&P went bankrupt and in approximately 1980 and the former Burlington Northern Railroad (BN) acquired the former CMSTP&P trackage which is part of this proceeding. The GN merged in March 1970 to become part of the Burlington Northern Railroad (BN). In September 1995 BN

and The Atchison Topeka and Santa Fe Railway (ATSF) merged to become The Burlington Northern and Santa Fe Railway (BNSF). In January 2005 BNSF changed its name to BNSF Railway.

(6) A brief summary of documents in the carrier's possession, such as engineering drawings, that might be useful in documenting a structure that is to be historic;

Documents in BNSF's possession concerning this abandonment may include alignment maps showing the right-of-way and/or station maps. Such documents are too large for practical reproduction in this report, but can be furnished upon request, if they are available.

(7) An opinion (based on readily available information in the railroad's possession) as to whether the site and/or structures meet the criteria for listing on the National Register of Historic Places (36 C.F.R. § 60.4), and whether there is a likelihood of archaeological resources or any other previously unknown historic properties in the project area, and the basis for these opinions (including any consultations with the State Historic Preservation Office, local historical societies or universities);

The Montana Historical Society believes that there are some sites in the area that may be eligible for listing on the National Register of Historic Places and they feel that a cultural resources inventory be conducted in order to determine whether or not sites exist and if they will be impacted. See Exhibit K, letter from the Montana Historical Society.

BNSF is in the process of creating an archeological survey that would determine whether or not any potential archaeological or historical site will be impacted by the proposed abandonment.

(8) A description (based on readily available information in the railroad's possession) of any known prior subsurface ground disturbance or fill, environmental conditions (naturally occurring or manmade) that might affect the archaeological recovery of resources (such as swampy conditions or the presence of toxic wastes), and the surrounding terrain.

BNSF is not aware of any known prior subsurface ground disturbance or fill or any other environmental conditions (naturally occurring or man-made) that might affect the recovery of archaeological resources.

VIA EMAIL (original to follow by First Class Mail)

Re: BNSF Railway Company Abandonment of Moore, Montana to Lewistown, Montana

Dear Mr. Nettles,

Thank you for your letter dated May 24, 2005, concerning the proposed BNSF abandonment. Can you tell us when BNSF plans to issue its formal notice to abandon this particular line? The City of Lewistown and Fergus County are both interested in possibly pursuing railbanking to preserve this particular corridor for future transportation and utility uses as well as some recreational trails. Also, we have been working locally to have a phase II environmental assessment performed on the BNSF property proposed for abandonment but can't seem to obtain the necessary permission from BNSF to accomplish this.

We would like to have discussions with someone in a position to represent BNSF's position in these matters. Please let us know if you/your firm will be in a position to contact regarding this.

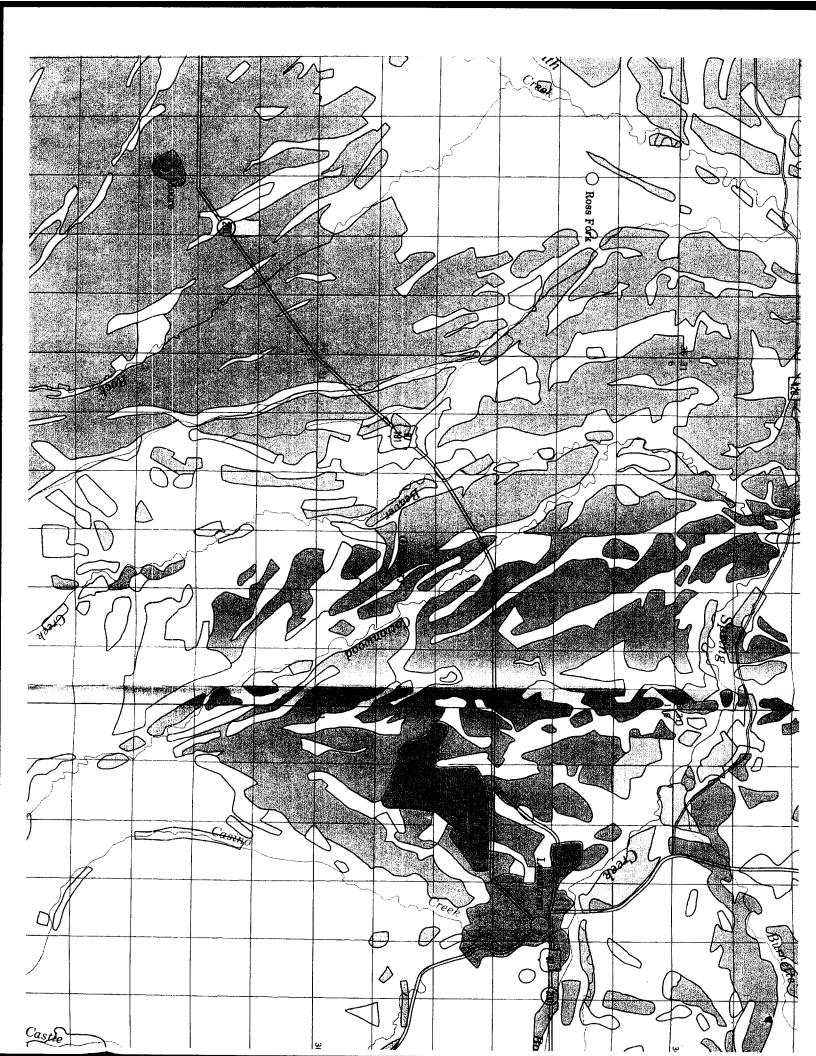

Thank you for your attention to this matter.

Sincerely,

MONTE J. BOETTGER Lewistown City Attorney

Re: BNSF Abandonment of Moore, Mt. to Lewistown, Mt.

Per your request on the proposed abandonment of the BNSF railroad from Lewistown Montana to Moore, Montana and the spur lines to Berg Lumber and the Heathe spur line, I have conducted an evaluation of the effect on prime agricultural (farmland) lands.

The Railroad does cross Farmlands that would be Prime Farmland irrigated. I am enclosing a map for reference. Because the abandonment entails only the proposed removal of the tracks and railroad ties, the impact on these lands is not a significant action that would prohibit use of these lands for future agricultural production.

If you have any questions or comments, please contact me.

Thank you for the opportunity to comment.

Sincerely,

Ted Hawn

District Conservationist

### FISH AND WILDLIFE SERVICE

ECOLOGICAL SERVICES MONTANA FIELD OFFICE 100 N. PARK, SUITE 320 HELENA, MONTANA 59601 PHONE (406) 449-5225, FAX (406) 449-5339

M.18 – FRA (I) Railroad Abandonment Project June 13, 2005

Brian Nettles, Paralegal 311 South Wacker Drive Suite 3000 Chicago, Illinois 60606-6677

Dear Mr. Nettles:

This letter responds to your correspondence received in our office on May 27, 2005 and your request for the U.S. Fish and Wildlife Service's (Service) comments on the proposed project to abandon 21.25 miles of railroad lines in Montana. We understand that this project would occur between M.P. 9.50 near Moore, Montana and M.P. 28.35 near Lewistown, Montana.

In accordance with section 7(c) of the Act, the Service has determined that the following listed species may be present in the action area:

FERGUS COUNTY		
Scaphirhynchus albus	Pallid Sturgeon	LE
Haliaeetus leucocephalus	Bald Eagle	LT
Mustela nigripes	Black-footed Ferret	LE

LE = Listed Endangered

LT = Listed Threatened

Two additional tables containing more specific species information are also enclosed with this letter. This data was collected within a 10.0 mile buffer surrounding both Moore and Lewistown, Montana. According to these tables there are no federally listed species within a 10.0 mile buffer of either town. These buffers were designed to encompass the entire project area as described in your letter to the Service. A more detailed species list could be generated if your firm was able to provide the Service with the Section, Township and Ranges of the project area. The information provided in these tables was found at the Natural Resources Inventory System (NRIS) under interactive maps and data applications (http://nris.state.mt.us/).

The Service is providing this information to assist you in determining possible impacts to species of federal concern. There are state species of concern in the vicinity of the project and we recommend contacting Montana Fish, Wildlife and Parks at 1420 East Sixth Avenue, P.O. Box 200701, Helena, Montana 59620-0701, 406-444-2535 or the Montana Natural Heritage Program, 1515 East Sixth Avenue, P.O. Box 201800, Helena, Montana 59620-1800, 406-444-5354.

Section 7(c) of the Act requires federal agencies proposing major construction activities complete a biological assessment to determine the effects of the proposed actions on listed and proposed species. A major construction activity is defined as "a construction project (or other undertaking having similar physical impacts) which is a major federal action significantly affecting the quality of the human environment as referred to in the National Environmental Policy Act" (50 CFR Part 402). If a biological assessment is not required (i.e., all other actions), the federal agency is still required to review their proposed activities to determine whether listed species may be affected. If such a determination is made, formal consultation with the Service is required.

For those actions wherein a biological assessment is required, the assessment should be completed within 180 days of initiation. This time frame can be extended by mutual agreement between the federal agency or its designated non-federal representative and the Service. If an assessment is not initiated within 90 days, this list of threatened and endangered species should be verified with the Service prior to initiation of the assessment. The biological assessment may be undertaken as part of the federal agency's compliance of section 102 of the NEPA and incorporated into the NEPA documents.

We recommend that biological assessments include the following:

- 1. A description of the project.
- 2. A description of the specific area that may be affected by the action.
- 3. The current status, habitat use, and behavior of T/E species in the project area.
- 4. Discussion of the methods used to determine the information in Item 3.
- 5. An analysis of the affects of the action on listed species and proposed species and their habitats, including an analysis of any cumulative effects.
- 6. Coordination/mitigation measures that will reduce/eliminate adverse impacts to T/E species.
- 7. The expected status of T/E species in the future (short and long term) during and after project completion.
- 8. A determination of "May affect, likely to adversely affect" or "May affect, not likely to adversely affect" for listed species.
- 9. A determination of "is likely to jeopardize" or "is not likely to jeopardize" for proposed species.
- 10. Citation of literature and personal contacts used in developing the assessment.

If it is determined a proposed program or project "is likely to adversely affect" any listed species, formal consultation should be initiated with this office. If it is concluded the project "is not likely to adversely affect" listed species, the Service should be asked to review the assessment and concur with the determination of no adverse effect.

A federal agency may designate a non-federal representative to conduct informal consultation or prepare biological assessments. However, the ultimate responsibility for section 7 compliance remains with the federal agency and written notice should be provided to the Service upon such a designation. We recommend federal agencies provide their non-federal representatives with proper guidance and oversight during preparation of biological assessments and evaluation of potential impacts to listed species.

Section 7(d) of the Act requires that the federal agency and permit/license applicant shall not make any irreversible or irretrievable commitment of resources which would preclude the formulation of reasonable and prudent alternatives until consultation on listed species is completed.

If wetlands may be impacted by this project, Corps of Engineers Section 404 permits may be required. The Service suggests the proposed project be designed to avoid and minimize impacts to any wetland areas, stream channels and surrounding vegetation to the greatest extent possible. Where feasible, minimize the area necessary for construction to reduce direct habitat impacts. The applicant should analyze direct, indirect and cumulative impacts along with future activities required to maintain these improvements.

There may also be some groundwater quality issues and concerns involved with this project. If the applicant has not done so already, the Service recommends contacting the Montana Department of Environmental Quality for permitting and technical expertise.

The Service appreciates your efforts to incorporate fish and wildlife resource concerns into your project planning. If you have questions or comments related to this issue, please contact Sierra Harris at 406-449-5225, extension 202 or me at extension 205.

Sincerely,

R. Mark Wilson

Re: BNSF Railway Abandonment - Fergus County, Montana

Dear Mr. Nettles:

In response to your letter of May 24, the Montana Department of Fish, Wildlife & Parks owns and operates many sites in the Lewistown vicinity due to its proximity to Big Spring Creek, considered to be one of the most valuable fisheries resources in this state. The purpose of this letter is to provide you the enclosed map showing the existing land interests held by this agency. Another site that is currently being negotiated for acquisition is adjacent to the Lazy KB site but is not shown on the map. You will receive additional comments regarding the proposed abandonment and its effects from local FWP staff more knowledgeable about possible impacts.

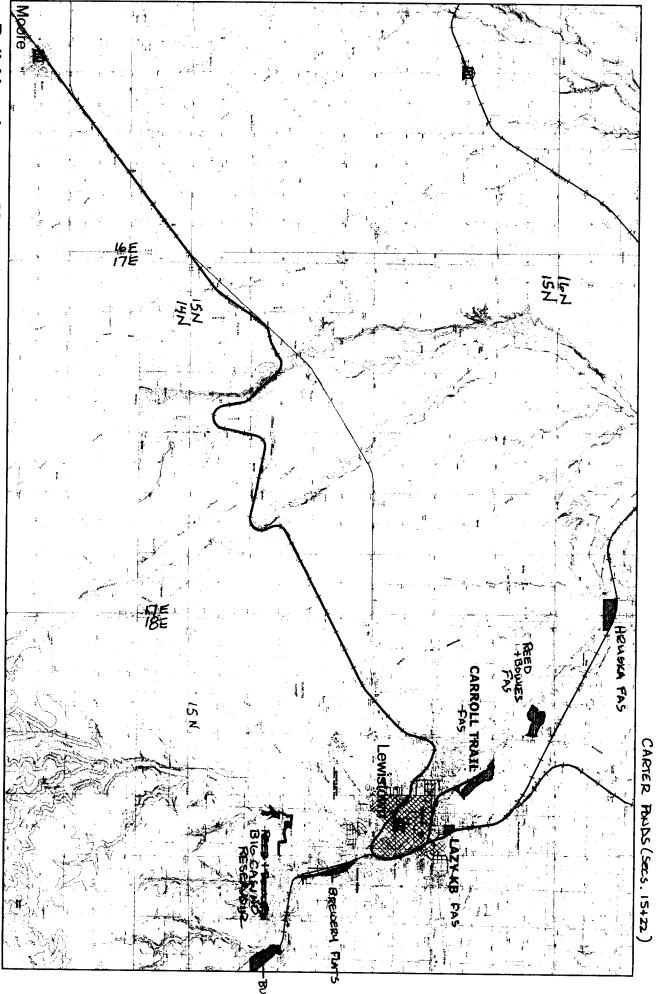

Public access to this stream is very important to the local economy and to visiting anglers and recreationists. This agency is always interested in pursuing any available opportunities in this regard. Therefore, we encourage the BNSF to continue to provide for future public access along the proposed abandoned right of way wherever possible.

Sincerely,

Lobert Lals

Dear Sir or Madam:

On or after November 17, 2005, we are filing with the Surface Transportation Board ("STB") a Notice of Exemption seeking authority to abandon 21.25 miles of railroad line between M.P. 9.50 near Moore, Montana to M.P. 28.35 near Lewiston, Montana. The line also includes the 1.30 mile Berg Lumber Spur (Milepost 0.00 - Milepost 1.30) and the Heath Spur (Milepost 0.00 - Milepost 1.10), which traverses through United States Postal ZIP Codes 59457 and 59464 in Fergus County, Montana. Attached are a Environmental and Historic Reports describing the proposed action and any expected environmental or historic effects, as well as a map of the affected area.

We are providing this report so that you may review the information that will form the basis for the STB's independent environmental analysis of this proceeding. If any of the information is misleading or incorrect, if you believe that pertinent information is missing, or if you have any questions about the Board's environmental review process, please contact the Section of Environmental Analysis (SEA), Surface Transportation Board, 1925 K Street, N.W., Room 504, Washington, D.C. 20423-0001, telephone (202) 565-1538 and refer to the above Docket Number. Because the applicable statutes and regulations impose stringent deadlines for processing this action, your written comments to SEA, with a copy to our representative, would be appreciated within three weeks.

Your comments will be considered by the Board in evaluating the environmental and/or historic preservation impacts of the contemplated action. If there are any questions concerning this proposal, please contact our representative directly. Our representative in this matter is Michael Smith who may be contacted by telephone at (312) 360-6724 or by mail at 311 S. Wacker Dr, Suite 3000, Chicago, Illinois 60606-6677.

Sincerel

The National Park Service reviewed this project, and determined that no parks will be affected; therefore, we have no comments.

H

RE: BNSF Railway Company- Montana to Lewistown

Dear Mr. Nettles:

Pursuant to Section 75-5-402 of the Montana Water Quality Act (WQA), the Department is required to examine plans and other information to determine whether a permit is necessary. In order for the Department to complete this review, the proponent must complete the applicable discharge permit application forms for the proposed activity, provide the information required by the applicable rule and submit the necessary application fees. Alternatively, the applicant may submit detailed plans and specifications on the proposed activity along with a description of the volume and nature of the wastes to be discharged. In accordance with ARM 17.30.201; the fee for review of plans and specifications is one-half of the application fee. Bureau staff are available to assist you in determining the appropriate application requirements.

Based on the information submitted, the Department is unable to determine what permits are necessary for the proposed project. For your convenience I have enclosed a fact sheet that describes water quality related permits for construction activities. Discharge of storm water from: industrial facilities as defined in ARM 17.30.1102(29) and (30); from construction activities as defined in ARM 17.30.1002(28); and from municipal separate storm sewer systems (MS4) as defined in ARM 17.30.1102(23), are subject to the permitting requirement of the Montana Pollutant Discharge Elimination System (MPDES).

In general, the Montana WQA prohibits the discharge of sewage, industrial or other wastes, including sediment, to state waters without a current permit from the Department. The definition of state waters includes any body of water on the surface or underground (ground water) and includes irrigation systems, ephemeral and intermittent drainage systems, lake, ponds or other waterways. Discharge of wastes to state surface water is regulated under the Montana Pollutant Discharge Elimination System (MPDES) program; a discharge, or potential discharge, to state ground water are regulated under the Montana Ground Water Pollution Control System. The

Mr. Brian Nettles June 15, 2005 Page 2 of 2

Additional information on permitting requirements may be obtained by contacting the Water Protection Bureau at (406) 444-3080 or on the Department's Website at: <a href="www.deq.state.mt.us">www.deq.state.mt.us</a>.

Sincerely,

Thomas D. Reid

Water Quality Permits Program Manager

Water Protection Bureau

File: General

cc: Fact Sheet: Construction Related Water Quality Permits

Storm Water Requirements for Construction Activity

#### Fact Sheet Water Quality Permits for Construction Related Activities

Water Protection Bureau

Montana Department of Environmental Quality

MPDES Storm Water Permit: Construction related activities that result in greater than one acre of disturbance and may generate storm water runoff from the construction site during the life of the project must obtain authorization prior to initiation of the construction activity. For purposes of this regulation, construction activities include clearing, grading, excavation, and stockpiling or placement of earthen materials. Routine maintenance activities that disturb less than 5 areas and do not change the original configuration of the site are not subject to this regulation. The owner or operator is required to develop a Storm Water Pollution Prevention Plan (SWPPP). These discharges are covered under a general permit (MTR10000). Coverage under the general permit is effective upon receipt of a completed NOI package (application, storm water pollution prevention plan, and fee).

MPDES Construction Dewatering: Non-storm water discharges of sediment laden water from coffer dams, trenches, pipeline construction, excavation pits, borrow areas, well development or other activities that is discharged to state waters, including irrigation canals, drainage ditches and wetlands, are prohibited unless authorized by the Department. Typically, these activities are authorized under the Department's general permit for construction dewatering (MTG070000). Under most conditions the permittee is required to construct and operate some form of treatment to remove turbidity and sediment to meet state water quality standards. The discharge of ground water that contains petroleum contaminates or other wastes must be authorized and comply with the requirements of the Department's petroleum clean up general permit (MTG790000 or MTX30000) prior to discharge to state surface or ground water. These permits are typically issued within 30 days of receipt of a completed application.

Short-term water quality standard for turbidity (318): Montana water quality standards prohibit the increase in sediment or turbidity above specific amounts in state surface waters. A Section 318 authorization provides a short-term turbidity standard for activities that are conducted in state waters and may cause disturbance of the stream bed sediments. A 318 authorization is typically processed in 7 to 21 days but may require longer review for complexity or environmentally sensitive areas.

401 Certification: Section 404 of the federal Clean Water Act is administered by the US Army Corps of Engineers; these permits are for dredge and fill in waters of the US, including wetlands. Please contact the Corps at (406) 441-1375. The Department provides CWA 401 certification of 404 projects and works directly with the Corps on these issues. A joint application form is used.

#### **General Information**

Fees: All of the above permits require the applicant to pay a fee prior to Department review of the application. The fee varies depending on the type of permit and complexity of the project. A fee schedule is available upon request at (406) 444-3080, or on the Departments website at:

www.deq.state.mt.us

# What is the Purpose of a Storm Water Pollution Prevention Plan (SWPPP)?

A SWPPP is developed and implemented by the permittee for three major purposes:

- Assessing the characteristics of the site such as nearby surface waters, topography, and storm water runoff patterns;
- 2. To identify potential sources of pollutants such as sediment from disturbed areas, and stored wastes or fuels; and
- To identify Best Management Practices
  (BMPs) which will be used to minimize or eliminate the potential for these pollutants to reach surface waters through storm water runoff.

BMPs at construction activity sites typically consist of various erosion and sediment control measures. Erosion and sediment control at construction sites is best accomplished with proper planning, installation, and maintenance of controls.

Most erosion and sediment controls require regular maintenance to operate correctly. Accumulated sediments should be removed frequently and materials should be checked periodically for wear. Regular inspections by qualified personnel should be performed after major storm or snowmelt events and as required in the General Permit.

# What are the Fees?

Fees based on the number of discharges are determined by multiplying the appropriate fee amount by the number of named or perennial surface waters (as shown on a USGS topographic map) which could receive storm water runoff from

the construction activity site. The NOI (application) fee amount per discharge for storm water associated with construction activity is \$450.00 for commercial or public projects, and \$250.00 for residential (single family dwelling) projects. The annual fee amount per discharge is \$450.00 (per calendar year) for commercial or public projects, and there is no annual fee for residential (single family dwelling) projects.

Freeborn and Peters, LLP Attn: Brian Nettles 311 South Wacker Drive Suite 3000 Chicago, Illinois 60606-6677

Dear Mr. Nettles:

We have reviewed your information to abandon 21.25 miles of Burlington Northern Santa Fe Railroad line between M.P. 9.50 and M.P. 28.35 located between Moore and Lewistown , Fergus County, Montana. Also included for abandonment are the Berg Lumber Spur (M.P. 0.00 to M.P. 1.30) and the Heath Spur (M.P. 0.00 to M.P. 1.10).

Under the authority of Section 404 of the Clean Water Act, Department of the Army permits are required for the discharge of fill material into waters of the United States. Waters of the United States include the area below the ordinary high water mark of stream channels and lakes or ponds connected to the tributary system, and wetlands adjacent to these waters.

Based on the information you provided that no fill material will be placed either temporarily or permanently in a water of the United States, no Department of the Army permit is required for this project. However, this does not eliminate the requirement to obtain other applicable federal, state, tribal and local permits.

If you have any questions, please call Vicki Sullivan of this office at (406) 441-1375, and reference File No. 2005-90-372.

Sincerely,

Allan Steinle

Montana Program Manager

RE: THE BNSF RAILWAY COMPANY ABANDONMENT OF MOORE -LEWISTOWN MONTANA. SHPO Project #: 2005071404

Dear Mr. Nettles:

I have conducted a cultural resource file search for the above-cited project. According to our records there have been several previously recorded sites within the designated search locales. In addition to the sites there have been several previously conducted cultural resource inventories done in the areas. I have enclosed a list of these sites and reports. If you would like any further information regarding these sites or reports you may contact me at the number listed below

Based on the sites in the area and that some may be eligible for listing on the National Register of Historic Places we feel that this project has the potential to impact cultural properties. We, therefore, recommend that a cultural resource inventory be conducted in order to determine whether or not sites exist and if they will be impacted. Thank you for consulting with us.

If you have any further questions or comments you may contact me at (406) 444-7767 or by e-mail at dmurdo@mt.gov.

Sincerely,

Damon Murdo

Cultural Records Manager
